KRIYOS
Where Customization meets Innovation

CAPABILITY STATEMENT

Kriyos LLC

UEI ER7VFAVHJAW1 CAGE 8BG92

Kriyos builds **StatusWeave**, AI-powered contract oversight for federal program offices, and delivers **cybersecurity, Zero Trust, cloud security, AI governance, and Microsoft 365 modernization** with small senior teams and vetted specialists. Software and services for accountable federal programs.

Product-led.
Security-first.
Federal-ready.

CORE COMPETENCIES

What we deliver

Cybersecurity and Zero Trust

Zero Trust architecture and maturity roadmaps, ICAM and least privilege, SIEM integration, vulnerability management, incident readiness.

Cloud security and modernization

GovCloud landing zones and guardrails on AWS, Azure Government, and GCP. FedRAMP-aligned architectures, DevSecOps, STIG baselines.

AI assurance and governance

AI use case inventory and risk tiering, alignment to OMB AI policy and the NIST AI RMF, evaluation and human review design.

Contract oversight support

COR file setup and maintenance, deliverable and acceptance tracking, CPARS evidence and narrative preparation.

Microsoft 365 modernization

SharePoint, Power Apps, and Power BI in GCC and Azure Government. Intranet operations, approval workflows, legacy reporting migration.

Specialized staff

Security engineers, cloud architects, Power Platform developers, and program analysts placed on task orders as programs need capacity.

PRODUCT

StatusWeave

AI-powered contract oversight for federal program offices. StatusWeave reads contractor status reports, scores contract health across the portfolio, and flags schedule, deliverable, staffing, and cost risk. Every finding cites its source in a curated library of 186+ federal documents, including the FAR, OMB memoranda, and NIST guidance. A named government reviewer accepts or rejects each finding, and every action is logged. **statusweave.com**

STATUSWEAVE

SW-23-F-0042	Watch
SW-25-C-0009	On track
FAR 42.1503	cited

PAST PERFORMANCE

USDA Agricultural Research Service: Axon digital workspace

Subcontractor / 2019 to 2022 / Azure Government, Microsoft 365 GCC

Operations, maintenance, and enhancement of the ARS intranet and collaboration platform: SharePoint 2013 and 2019 farms, Power Apps and Power BI development, and automated administrative and grant approval workflows. Azure DevOps CI/CD with static code analysis, penetration testing support, vulnerability scanning, SIEM integration, and Section 508 compliance.

ENGAGEMENT MODEL

From first briefing to production

01
Discovery
2 weeks
Map the portfolio, security posture, and data rules.

02
Pilot
60 to 90 days
Deliver a defined scope against agreed measures.

03
Production
Program office
Scale with training and authorization support.

Differentiators

- **We own the product.** StatusWeave is Kriyos IP, so services come with a working platform, not slideware.
- **Grounded AI.** Findings cite federal sources and stay under government decision authority.
- **Senior delivery.** Small teams led by architects with federal, defense, and identity program experience.
- **Compliance built in.** FedRAMP, STIG, Section 508, and NIST evidence produced in the pipeline.

Company data

UEI	ER7VFAVHJAW1
